

MagMa Magic Machine is a program based on graphic libraries specific for Windows, so it can run also under Windows VISTA and 7, both 32 and 64 bit.

We suggest you to disable the forced user account control (UAC) otherwise this could cause big problems with the update ITA aka ItalianDB.

MagMa Magic Machine runs under the following versions signed by Microsoft:

Win98

Win98SE

WinNT

Win2000

WinME

WinXP

Win2003

WinVISTA

Win7
