

## **My Antivirus finds a virus in MagMa!**

Tuesday, 13 May 2008 01:39

---

Q: My freeware Antivirus (ie AVG or Avast) says that in some files of MagMa Magic Machine there is a virus Pepatch.

A: Don't worry, it is a FALSE POSITIVE, the official files of MagMa are checked and verified in their integrity and safety: there is NO virus. Choose to ignore the files in your Antivirus in order to avoid block/deletion that could compromise the execution of the game.
