

Q: Trying to open the deckbuilder I get the message: "run time error '339' component 'COMCT232.OCX' or one of his dependencies not correctly registered: a file is missing or invalid." What should I do?

A: Use one of the following solutions:

- 1) If you use Windows Vista or Windows 7 to rerun the installation of MagMa "as Administrator" (right mouse button on the file).
- 2) Find the file COMCT232.OCX on the Internet, download it and place it manually in the game folder.
